Subject index

Volume 19 (2004)

Accelerometry; Gait analysis; Reliability; Human locomotion; Motor control **19**, 288

Adaptation; Posturography; Weight; Muscle fatigue **19**, 184

Ageing; Stopping; Gait termination; Stimulus probability; Falls **19**, 243

Aging; Obstacle negotiation; Gait; Locomotion; Fear of falling **19**, 226

Anthropometry; DXA; Gait; Pediatrics; Kinetics **19**, 133

Attention; Dual-task; Gait; Obstacle avoidance **19**, 279

Attention; Vestibular; Balance; Sensory; Posture **19**, 105

Balance; Chemotherapy; Leukemia; Centre of pressure **19**, 1

Balance; Vestibular; Attention; Sensory; Posture **19**, 105

Balance; Control; Posture; Falls; Detection **19**, 252

Balance; Gait; Perturbation; Stability; Vestibular **19**, 24

Base of support; Total hip arthroplasty; Gait; Dynamic stability; Double limb support **19**, 141

Bilateral measures; Parkinson's disease; Posture control; Deep brain stimulation; Centre of pressure **19**, 172

Biomechanical model; Gait analysis; Multibody dynamics; Error analysis **19**, 35

Biomechanics; Gait; Electromyography **19**, 91

Biomechanics; Postural control; Toe-standing **19**, 11

Bone pins; Validity; Surface markers; Knee kinematics; Gait **19**, 76

Center of mass; Quiet stance; Kinematic; Segment and joint angles **19**, 124

Centre of gravity; Visual feedback; Time delay; Postural control; Centre of pressure **19**, 154

Centre of pressure; Balance; Chemotherapy; Leukemia **19**, 1

Centre of pressure; Parkinson's disease; Posture control; Deep brain stimulation; Bilateral measures **19**, 172

Centre of pressure; Visual feedback; Time delay; Postural control; Centre of gravity **19**, 154

Cerebellum; Postural responses; Short-term habituation; Long-term habituation **19**, 16

Cerebral palsy; 3D-gait analysis; Normalcy index **19**, 85

Cerebral palsy; Crouch; Gait analysis; Hamstring lengthening **19**, 298

Chemotherapy; Balance; Leukemia; Centre of pressure **19**, 1

Children; Gait; Human walking; Foot development; Plantar pressure distribution **19**, 235

Computer simulation; Human locomotion; Muscle function; Motor control; Concentric muscle activity; Eccentric muscle activity **19**, 194

Concentric muscle activity; Human locomotion; Computer simulation; Muscle function; Motor control; Eccentric muscle activity **19**, 194

Control; Balance; Posture; Falls; Detection **19**, 252

Crouch; Cerebral palsy; Gait analysis; Hamstring lengthening **19**, 298

Deep brain stimulation; Gait analysis; Parkinson's disease; Subthalamic nucleus stimulation; Trunk movement; Motor rehabilitation **19**, 164

Deep brain stimulation; Parkinson's disease; Posture control; Centre of pressure; Bilateral measures **19**, 172

Detection; Balance; Control; Posture; Falls **19**, 252

Direction; Force; Pedal; Stroke; Leg **19**, 58

Double limb support; Total hip arthroplasty; Gait; Dynamic stability; Base of support **19**, 141

Dual-task; Attention; Gait; Obstacle avoidance **19**, 279

DXA; Anthropometry; Gait; Pediatrics; Kinetics **19**, 133

Dynamic knee orthosis; Patellofemoral pain; Knee **19**, 148

Dynamic stability; Total hip arthroplasty; Gait; Double limb support; Base of support **19**, 141

Eccentric muscle activity; Human locomotion; Computer simulation; Muscle function; Motor control; Concentric muscle activity **19**, 194

Elderly people; Gait initiation; EMG **19**, 50

Electromyographic; Gait; Walking speed **19**, 270

doi:10.1016/S0966-6362(04)00064-5
